Agromet Advisory:

Crop Stage/ Condition | Pest and Disease | Agro advisories |
----------------------|------------------|-----------------|
**Agriculture crop**  |                  |                 |
**Vegetables**        | Advised to provide irrigation to vegetable and other crops. |

**Horticulture crop**

**Mango**

- Remove the weeds such as lantana which are growing under the mango tree.
- Destroy the termite mount and termite by drenching Chloropyriphos @ 5-10 ml/ litre of water or Place 2 Aluminum phosphate /termite mount which has one meter circumstances and close all the holes with wet clay soil to avoid air entering into the mount.

**Animal Husbandry**

- Preparation of silage and use silage during summer season when shortage of green fodder
- Proper ventilation should be maintained for free circulation of air in the sheds.
- Keep the cattle shed clean.
- Drinking water management of 60 lts. of water/day/animal
- Animals allow for grazing early in morning or later in evening
