Agromet Advisory:

Soil testing: This is best time for testing of soil mineral content in crop lands and prepares required dosage of fertilizers for next sowing season.
Take up summer ploughing making best use of unusual rainfall which helps in control of weeds, soil borne pest and disease.

Crop Stage/ Condition | Pest and Disease | Agriculture crops
---|---|---
Cereals and Pulse | Avoid sun drying and cleaning of cereals and pulse crops due to cloudy weather and light rainfall forecast |

Horticulture crops

Mango | Due to low temperature in morning hours congenial condition for attacking powdery mildew disease and leaf hopper pest on mango orchard. Hence farmers are advised to take up control measure by spraying of Dinocoph @ 0.5 ml/ l of water or Spray Profeneb @ 2 g/L or Imidachlorprid 17.8 SL @ 0.3 ml/ L of water |

Animal husbandry | Provide shade to milch animals for increasing temperature day by day and decreasing relative humidity. Sprinkle water in milch animal for reducing body heat due to excess temperature.
