Agromet Advisory:

Agriculture crop

Redgram and Ragi Advised for harvested crops winnowing, cleaning, drying and storage in dry gunny bag. Provide protective irrigation on rabi crops.

Horticulture crop

Mango

- Dry spell situation exists since one month, it is favorable for higher flowering and this weather also favorable for Powdery mildew diseases.
- Leaf hopper and Powdery mildew disease incidence is more during before flowering and immediately after fruit formation to manage spraying of Carbaryl, 50WP @4g/ litre of water or Imidachlorprid @ 0.3ml/ litre of water for management of leaf hopper.
- Spray Lambda Cyhalothrin 5EC @ 0.5 ml/ litre of water or sulphur dust (SULTAF) 80W @3g/litre of water against the Powdery mildew diseases.
- Incidence of Leaf hopper severe to spray Azadirachtin (10,000 PPM) @ 7.0 ml/ litre of water.
- If Phanerogamic plants are growing on the mango tree to cut/prune out completely and apply Bordeaux paste or Copper oxy chloride that portion.
- Remove the weeds such as lantana which are growing under the mango tree.
- The shoots/branches touching ground may be thinned and ground clearance of the canopy main field to prevent the incidence of pests and disease.
- Destroy the termite mount and termite by drenching Chloropyriphos @ 5-10 ml/ litre of water or Place 2 Aluminum phosphate/termite mount which has one meter circumstances and close all the holes with wet clay soil to avoid air entering into the mount.
