Forecast Summary

As forecast received from IMD, cloudy sky with **no minfall** may be expected from 23.11.2024 to 27.11.2024in Kodagu district. The day temperature is expected to be 25.4-28.5°C & night temperature is expected 16.7-17.7°C. The relative humidity in the morning hours is expected to be 81-90% & afternoon relative humidity is expected to be in the range of 42-48%. Wind speed expected to be 5.2-7.1km/hr.

Recommendations to the farmers:-							
Crop Pest/Disease Damage symptoms Control measures							
General Advisory:							
✓ As no rainfall is expected, schedule light but consistent irrigation for crops like cabbage,							
cauliflower, tomato, and beans.							
✓ Avoid over-irrigation, particularly for crops in fruit and pod development stages, to prevent diseases							
like fruit rot and root rot.							
✓ Monitor crops regularly for pests such as aphids, pod borers, and fruit borers.							
✓ Use eco-friendly pest control methods such as neem oil or pheromone traps.							
✓ Mulch around crops to conserve soil moisture and suppress weed growth.							
✓ Apply balanced fertilizers, especially potash and nitrogen, to support growth in critical stages like							
 fruiting and pod formation. ✓ Prune dead or diseased parts to promote healthy growth. 							
The sease of another parts to promote nearly growth							
 ✓ Protect sensitive crops like banana and coffee from strong winds by supporting them with stakes. ✓ For turmeric and ginger ready for harvest, ensure proper drying of rhizomes to prevent fungal 							
growth.							
✓ Mulch and maintain basin formation around coconut, arecanut, and black pepper to conserve soil							
moisture.							
\checkmark Provide clean, dry shelters and adequate ventilation to livestock.							
✓ Increase feeding of high-energy fodder to maintain body warmth in cooler temperatures.							
✓ Maintain optimal room temperature (24-26°C) and humidity (65-75%) for silkworm rearing.							
\checkmark Feed silkworms fresh and healthy mulberry leaves to ensure uniform growth.							
 Ensure poultry houses are well-ventilated and dry. Provide clean drinking water and balanced feed to maintain productivity. 							
Provide clean drinking water and balanced feed to maintain productivity.							
✓ Look for early signs of fungal infections due to high humidity during the morning.							
✓ Use appropriate fungicides or organic solutions like garlic extracts for management.							
✓ Avoid field operations during peak midday hours to prevent heat exhaustion.							
 Ensure proper storage of harvested produce to maintain quality. 							

Weather based a	advisory	
Сгор	Stage	Advisory
Cabbage and	Head formation	Maintain adequate soil moisture through light irrigation. Watch
cauliflower	stage	for pests like aphids.
Deer	Pod formation	Ensure consistent soil moisture. Handpick pests like pod borers
Bean	stage	if observed.
Tomata	Fruit development	Stake plants to prevent fruit contact with soil. Avoid
Tomato	stage	overwatering to prevent diseases.
Ded grow	Pod initiation	Monitor for pod borers. Apply a light dose of fertilizers for
Red gram	stage	healthy pod development.
		Avoid waterlogging. Monitor for pests and prepare for
Paddy	Hard dough stage	harvesting soon.
Chilli	Fruit development	Remove damaged fruits and monitor for fruit rot or viral
Chilli	stage	infections.
Field bean	Pod development	Irrigate moderately. Monitor for pod pests like aphids.
Danana	Fruit development	Support the plants with props to prevent lodging. Apply potash-
Banana	stage	rich fertilizers.
Chilli	Vagatativa ata za	Perform timely weeding. Apply nitrogen fertilizers to promote
Chilli	Vegetative stage	healthy vegetative growth.

Turmeric,	TT (* (Harvest crops at maturity. Dry rhizomes properly to avoid post-
Ginger	Harvesting stage	harvest losses.
Dlask nonnon	Berry development	Ensure climbing support is firm. Apply foliar sprays to enhance
Black pepper	stage	berry quality.
Coffee	Berry development	Manage shade and mulch plants to conserve moisture.
	stage	
Horticultural	Various stages	Monitor for pests/diseases. Adjust irrigation based on stage-
crops Various stages		specific needs.
Plantation Variant Acad		Mulch around the base to conserve moisture. Prune older leaves
crops	Various stages	to promote airflow.
Livestock	Shelter and	Provide clean, dry shelters. Maintain hydration and balanced
Livestock	Feeding	feed to support health.
Contoulture	Dearing stage	Maintain optimal temperature and humidity in rearing rooms.
Sericulture	Rearing stage	Feed silkworms with fresh mulberry leaves.
Dovelterry	Chalter and Feeding	Ensure adequate ventilation in coops. Provide clean water and
Poultry	Shelter and Feeding	balanced feed.

Recommendation to farmers

Crop specific advisory:

Сгор	Stage	Advisory
Cabbage diamond back moth	Head stage	 Spray DDVP 76 EC. @0.5 ml./lit water in nursery. 15 days before transplanting around the main field and every 25 rows of cabbage one row of mustard sowing, 15 to 20 days after cabbage planting another row of mustard sowing. Mustard as trap crop. Spray on mustard with 0.5 ml. DDVP in a lit. water. During head formation, spray 5 per cent NSKE . Birdpurches may be provided to attract predatory birds.
Tomato whiteflies	Fruiting stage	Spray 1.0ml.Oxydemeton methyl 25 EC in a lit. water.
Bean Pod borer	Pod formation stage	Spray 2.0 ml. Malathion 50 EC./ lit. water .
Tomato Early and late blight of tomato	Fruiting stage	For late blight of tomato 15 days prior to transplanting Trichoderma and Pseudomonas enriched compost may be incorporated to the soil. For early blight control spray 2.0 g. Mancozeb 75 WP OR 2.0 g. Maneb OR 2.0 g. Metalaxyl- MZ 72WP. OR 2.0 g. Dimethomorph + polyram/lit. water. For control of late blight spray 2.0 g. Metalaxyl - MZ 72WP. OR 2.0 g. Fosetyl al 80 WP OR 2.0 g. Dimethomorph + polyram in a lit. water, 5 weeks after transplanting. Repeat the spray 7th, 9th and 11th weeks after

		transplanting. 200- 250 lit. spray solution required/acre/spray.
Rice earhead	Hard dough	> During milky stage of the crop; spray Malathion 50 EC. at 2.0 ml./lit. of water .
bug	stage	OR
		> Dust 8 - 10 kg. Malathion 5 D./acre during morning hours.
		Spray any one of the following insecticides per lit. water
		1) Imidacloprid 17.8 SL 0.5 ml.
		2) Thiamethoxam 25 WG 0.7 g.
		3) Monocrotophos 36 SL 1.5ml
		4) Chlorpyriphos 20 EC 2.0 ml.
		5) Buprofezin 25 EC 1.4ml.
Rice Brown	Hard dough	> Spray solution should reach the base of the plant.
plant hoppers	stage	> Around 400 to 450 lit. spray solution required/acre.
		Granular insecticide kg./ac
		1) Carbofuran 3 G- 8.0 2) Phorate 10 G- 5.0
		3) Quinalphos 5 G - 12.0
		N.B: Drain out the water and apply granules. Two days after
		application light irrigation may be provided.
		Pull out the infested plants and destroy.
Red gram	Pod initiation	20 - 25, 40 - 45 days after sowing spray 2.5 ml. Dicofol 18.5 EC./lit.
Sterility mosaic	stage	water.
-		ICP 7035 sterility mosaic resistant red gram variety.
		In endemic areas grow resistant banana variety - Sakkare bale.
		At the time of planting the rhizomes may treated with any one of the
		Fungicides /lit. water
Banana Leaf	Fruit	a)Propiconozole 25 EC 1.0 ml.
spot (Cigatoka)	development	b)Theiophenate methyl 70 Wdiv 1.0 g.
		c)Carbendazim 50 Wdiv 1.0 g.
		d)Metham Sodium (Vapom) - 1.0 g. In Mashy area provide drainage.
		Dust 10 kg. Fenvalrate 0.4 D.
Field bean pod	Pod	OR
borer	development	Malathion 5 D. per acre during morning hours.
		Apply any one of the following insecticides per lit. water
		a) Quinalphos 25 EC 2.0 ml.
Paddy Leaf	Panicle	b) Indoxacarb 14.5 SC 0.5ml.
folder	emergence	c) Flubendiamide 48 SC 0.08ml.
	stage	d) Flubendiamide 20 WG 0.2 g.
		Drain out the water and spray the insecticide. 250 - 300 lit. spray
Dadd	Dominia	mixture requires per acre.
Paddy Bacterial leaf	Panicle	25 and 50 DAT add 0.5 g. Streptocycline and 2.5 g. Copper oxychloride 50 WP for a lit. Water and spray. 200 to 250 lit. Spray
blight	emergence stage	mixture requires/acre/time.
		2.0 g. Metalaxyl - MZ 72Wdiv. in a lit. water. Before store of seed
Ginger	Harvesting	material soak them in 3.0 g. Mancozeb 75 Wdiv. in a lit. water for
Rhizome rot	stage	30 min then dry in shade and store.
D. O.I.	D	Drench 10 lit. fungicide mixture/vine viz., 0.125 per cent Metalaxyl
Pepper Quick	Berry	- MZ 72Wdiv.
wilt and black	development	OR
rot disease	stage	2 per cent Copper oxychloride 50 Wdiv.
<u> </u>		

Spray any one of the following fungicide in the month of August -
September.
Fungicides
a)1% Boardeaux mixture + 3 % Potassium phosphonate
b)1% Pseudomonas fluroscence.
Incorporate Trichogramma (50 g) enriched compost (5 kg.) to the
base of the vine.
