Conoral Advisory										

- Optimal Moisture Levels: Ensure cereals are dried to 12%, pulses to 9-10%, and oilseeds to 7-8% moisture content before storage.
- **Storage Practices:** Use moisture-proof containers or jute bags lined with polythene. Keep storage spaces clean, ventilated, and elevated to prevent pest infestation and mold growth.
- **Pest and Quality Management:** Regularly inspect stored produce for pests or mold. Use natural repellents like neem leaves or fumigants (with caution) for long-term protection.
